Service and Support Area

At the moment company is providing its products and services to 86 cities of Pakistan from Karachi to Islamabad. So in terms of Area Coverage Softronix is one of the largest domestic IT Services Providing Companies.

Customers

From its set up till today the Company has successfully designed, developed and deployed Information System for more than 1100 Industries, Businesses and Institutions and as the company is growing and getting more knowledge and experience this speed is continuously increasing. For example only in 2005 it has automated (computerized) one industry, business or institution every day.

Software Export / Outsourcing

Softronix has developed Online Information System in Java for some international or multinational companies that are currently running their business with the help of this online application software. Some of the International customers are:

- FIRST Shipping, Antwerp, Belgium,
- Maritime International, Antwerp, Belgium and
- Insha Mobiles LLC, Dubai, UAE

Software Export and outsourcing service was slow in the beginning due to the companies' commitment with domestic market but now company is accelerating its pace to export software products and outsource IT services. Now the company has got some more software development orders from its contacts abroad.

Current Project

Softronix is currently working on its first Application Development Framework, Report Writer and its own IDE on Java platform, to increase its Application development speed and quality and to further reduce cost. Company has decided to convert and all existing product and will develop all next products and custom applications under this Frame Work.

Next Move

The process of setting up a company in Canada has been started and in coming months the Corporate Office of the company would be moved to Canada to better manage its business in international market. Then current corporate office at Pakistan would be converted into Offshore Office that would continue monitoring its domestic business at Pakistan and provide outsourcing facility to our international offices.
